

Andika Eka Kurnia (2306033) - 1A RPL

Tugas 1

```
angka = int(input("Masukkan angka: "))

while not (angka > 50 and angka % 2 != 0):
    angka = int(input("Salah, masukkan angka: "))

print("Benar!")
```

The screenshot shows a code editor with a Python file named `test.py`. The code is as follows:

```
18 """
19 Solusi Fatra, Andika, Alwan, dan Bu Indira
20 """
21 angka = int(input("Masukkan angka: "))
22
23 while not (angka > 50 and angka % 2 != 0):
24     angka = int(input("Salah, masukkan angka: "))
25
26 print("Benar!")
```

Below the code editor is a terminal window showing the execution of the script:

```
PS C:\DikDns\Programming\myvideogamelist> python .\test.py
Masukkan angka: 22
Salah, masukkan angka: 22
Salah, masukkan angka: 222
Salah, masukkan angka: 223
Benar!
PS C:\DikDns\Programming\myvideogamelist>
```

On the right side of the terminal, there is a small video player window showing a person named Indira Syawarthy.
